

Customer Journey Map

Date	06 July 2026
Team ID	TMID-SL-2026-01
Project Name	SmartLender - Applicant Credibility Prediction for Loan Approval
Maximum Marks	2 Marks

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Apply	Stage 2: Screen	Stage 3: Decide
Actions	Applicant fills the loan form with personal, financial, and property details.	Credit officer opens Smart Lender, enters the same details, and submits for prediction.	Officer reviews the Approved/Rejected result and confidence score, then finalizes.
Touchpoint	Loan application form (bank branch / portal).	Smart Lender web app (predict.html form).	Smart Lender result page (submit.html) + officer's final sign-off.
Customer Thought	"Will I qualify? I hope my paperwork is enough."	"Let's see what the model says before I dig into every document by hand."	"Does this result make sense given what I see in the file?"
Customer Feeling	Hopeful but a little anxious.	Curious, slightly dependent on the tool.	Confident when the model and manual read agree.

Process Ownership	Applicant / bank front desk	Credit officer	Credit officer / branch manager
Opportunities	Simplify the form; explain what data is used and why.	Reduce manual cross-checking by trusting the model's confidence score for clear-cut cases.	Add explanation of which factors drove the prediction, to support the final decision.
