

# Communication

|               |                                                                  |
|---------------|------------------------------------------------------------------|
| Date          | 06 July 2026                                                     |
| Team ID       | TMID-SL-2026-01                                                  |
| Project Name  | SmartLender - Applicant Credibility Prediction for Loan Approval |
| Maximum Marks | 2 Marks                                                          |

How the team communicated and collaborated throughout the project.

| Aspect                      | Details                                                                                                       |
|-----------------------------|---------------------------------------------------------------------------------------------------------------|
| Communication Channels Used | In-person stand-ups, WhatsApp group for quick updates, shared Google Drive for the dataset/docs               |
| Meeting Frequency           | Twice weekly during active sprints (Sprint-1 through Sprint-4)                                                |
| Progress Tracking           | Sprint backlog (Project Planning.pdf) reviewed at the start/end of every sprint                               |
| Code Collaboration          | Shared GitHub repository with feature-level commits                                                           |
| Decision-Making Process     | Team lead (Zaheer Khan) facilitated model-selection and architecture decisions after each member presentation |
| Documentation Practice      | README.md kept current after each milestone; this 8-phase template filled in alongside development            |
