

Scalability & Future Plan

Date	06 July 2026
Team ID	TMID-SL-2026-01
Project Name	SmartLender - Applicant Credibility Prediction for Loan Approval
Maximum Marks	3 Marks

Roadmap for scaling and extending Smart Lender.

Area	Current State	Future Plan
Hosting	Local Flask dev server	Deploy on IBM Cloud for institution-wide, always-on access
Data Volume	614-row historical dataset	Retrain periodically on the institution's growing loan history
Model Freshness	Static model trained once	Scheduled retraining pipeline to catch data/behavior drift
Access Control	No authentication	Role-based login for credit officers vs. applicants
Explainability	Confidence score only	Add feature-importance explanations (e.g., SHAP) for each prediction
Integration	Manual form entry	Real-time credit bureau API integration to auto-fill credit history
Deployment Packaging	Run via python app.py	Containerize with Docker for portable, repeatable deployment
